

Jabil Implements PolyDyne's QuoteWin[®]

Austin, Tex.—February 1, 2008— PolyDyne Software Inc.[®] today announced that Jabil Circuit, Inc., a global electronic product solutions company, has implemented QuoteWin[®] as its global solution for direct materials quotations and contract price negotiations. After creating detailed product requirements and undergoing an exhaustive selection process, Jabil chose PolyDyne's QuoteWin application over several possible providers of supply chain applications.

QuoteWin was best suited to meet Jabil's global site requirements for managing new and existing business direct materials quotations and its corporate contract price negotiations. Additionally, a rapid implementation was essential in order to meet timely and strategic cost reduction targets. Through PolyDyne's rapid deployment services, Jabil was installed, trained and production ready in 45 days.

"We are proud to be a part of Jabil's objectives to exceed the quality expectations and competitive requirements of its customers through continuous improvement of product costing processes and sophisticated business intelligence," said David Tabb, CEO of PolyDyne Software. "Jabil, and its customers, will experience a rapid response in cycle time and an increased visibility of cost savings opportunities. We are pleased to welcome Jabil as a customer."
